KOO MEDICAL EQUIPMENT

KOO MEDICAL EQUIPMENT

Koo Medical Equipment is a multinational company that has been working for many years in the medical industry. Its headquarters and its production unit are located in the Far East.

The company specialises in the manufacture of plastics for medical use.

Our staff's commitment and expertise are a guarantee in the development and production of specialized products used for anesthesia or respiratory support.

Koo Medical Equipment has branches in Europe and Asia.

Every branch provides sales and, marketing support and constant group's collaboration allows the development of innovative solutions in the design and manufacture of medical devices.

A continuous control of raw materials used in the manufacture of our products and of the services offered to our partners is the basis of all the activities carried out by Koo Medical Equipment.

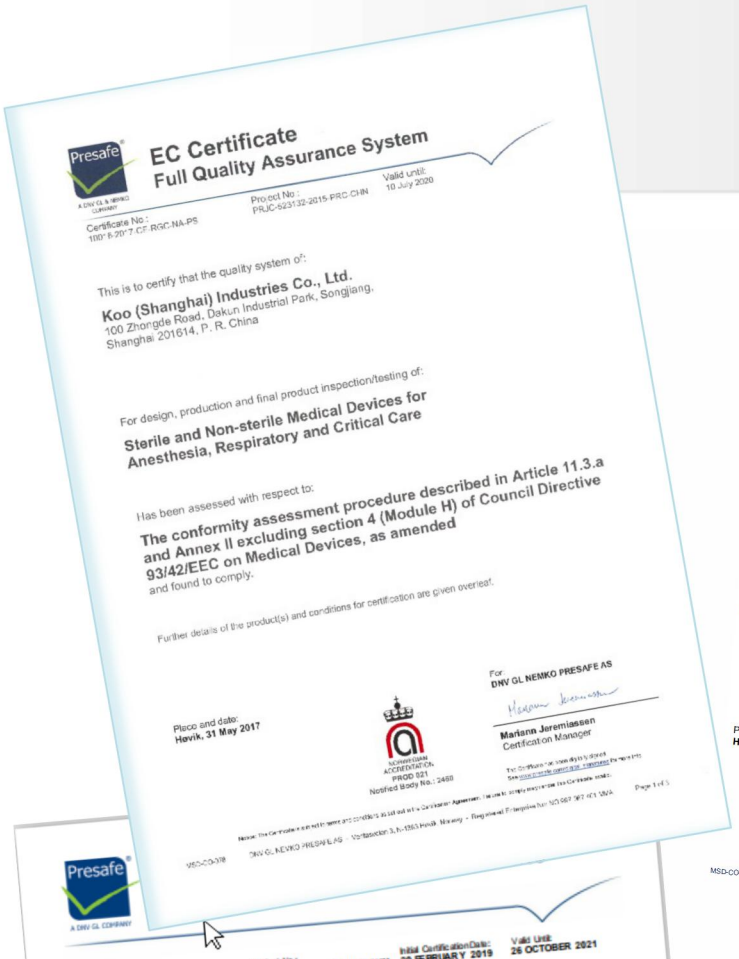

Each product designed and manufactured by Koo satisfies the strictest qualitative standards required by the market and all products are certified according to the European standards for Medical Devices attested by DNV-BUSINESS ASSURANCE-NORWAY-CE2460 class lla.

The production plants is ISO 13485 certified and FDA listed.

The respect for absolute quality in the anesthesia mask's production makes the company a world class manufacturer.

The same attention is used every day in all the activities carried out by the company in order to maintain high-quality standards both for the devices manufactured and for the services offered, thus achieving an excellent relationship with our partners.

Every product is manufactured with PVC material is, DEHP and BPA free.

EC Certificate
Full Quality Assurance System

Certificate No.: 100° 8-20° 7 CF-RGC-NA-PS
Project No.: PRJC-523132-2015-PRC-CHN
Valid until: 10 July 2020

This is to certify that the quality system of:

Koo (Shanghai) Industries Co., Ltd.
100 Zhongde Road, Dakun Industrial Park, Songjiang, Shanghai 201614, P. R. China

For design, production and final product inspection/testing of:

Sterile and Non-sterile Medical Devices for Anesthesia, Respiratory and Critical Care

Has been assessed with respect to:

The conformity assessment procedure described in Article 11.3.a and Annex II excluding section 4 (Module H) of Council Directive 93/42/EEC on Medical Devices, as amended
and found to comply.

Further details of the product(s) and conditions for certification are given overleaf.

Non-Invasive Ventilation Face mask

BluestarPLUS

for pulmonary ventilation's devices, modality CPAP and BILEVEL assisted and supervised.

- Innovative design that guarantees an optimal air-leak control and a high patient comfort level.
- Lightweight.
- Soft replaceable cushion minimizes skin breakdown.
- The kit has all the accessories for positioning.

kit contents:

- Transparent PVC mask with inflatable and replaceable cushion with inflation valve.
- DEHP free.
- Thumbscrew adjustable forehead cushion with two grips.
- Ports for O_2 and CO_2, pressure monitoring and a port for introducing gastric tubing and with the possibility of introducing a bronchoscope.
- Two connectors 22M and 22F.
- Pump for inflating and deflating the cushion.
- Headgear with a rapid removal system.
- Latex free.
- The mask's connector can be connected to expiratory system (KM-903 not in the kit) provided with a hole for the CO_2 discharge and with a port for the enrichment of O_2.
- Every kit is delivered in a box with a label indicating the contents.

Tri-Gym & Flo-Gym

Lung Exercisers

- In polycarbonate, tube and mouthpiece in polyethylene
- Latex free
- For inspiration and expiration
- With three measuring cylinders for the control of the flow
- Flow control is done through the three colored balls, which indicate the amount of flow per second 600 cc green, blue 900 cc, 1200 cc red.
- With corrugated tube and mouthpiece
- Single patient use

Tri-Gym

Code KM-805

a single packaging, 24 items per box.

Flo-Gym

Can be disassembled, cleaned with mild detergent and reassembled by hand.

Code: KM-802

pipeP Kit

System for lung exercises during inspiration and expiration

- Connectors and resistors in polycarbonate
- Latex free DEHP free. Two one-way valves:
  IN= inspiration OD 22mm
  OUT= expiration OD 22mm ID 15mm
- 8 resistors for PEP or PIP with color code with the following holes' diameters: 1,5 mm black, 2,0 mm white, 2,5 mm yellow, 3,0 mm blue, 3,5 mm green, 4,0 mm orange, 4,5 mm pink, 5,0 mm brown; with connector for manometer, OD 15 mm
- Mask not included in the kit
- Single patient use

Aerosol FISIOJET kit

- High quality compressor
- Nebulizer Fisiojet KM 1000 with high performance in polycarbonate
- Latex free
- DEHP free
- Elbow connector
- Mouthpiece
- Nose piece
- Connection tube
- In a carry bag

Every item is in a box

Code:

FJ001 Junior with Fisiojet infant mask and Fisiojet pediatric mask
FJ002 Senior with Fisiojet adult mask

FISIOJET nebulizer for aerosol therapy

- High efficiency nebulizer with inspiratory and expiratory valves
- This type of supply optimizes the inhalation therapy, guaranteeing maximum medication absorption during inspiration
  and minimum medication loss during expiration
- Minimal flow 3.0 l/min maximum flow 6.0 l/m
- Minimum capacity 2 ml maximum capacity 8 ml
- In polycarbonate
- DHEP and Latex free

Provided with the following items:
elbow connector, mouthpiece, nose piece

- single patient use

Code:

KM-1002 in a box

FISIOCHAMBER VISION spacer

- Anti-static Chamber: the special antistatic treatment of the chamber ensures a complete suspension of the drug, improving the dose available for the patient.
- Vision valve: the movement of the Vision Valve indicates inhalation and permits monitoring of patient compliance. The one-way valve has very little resistance to flow and can open with minimal inspiratory effort (suitable for patients with low tidal volume).
- Universal adapter PROPER FIT: the soft silicon material of the adapter ensures a perfect seal with all the inhaler connector's available on the market.
- Spiral vents: the spiral vent is designed to direct the drug to the one way valve, thereby increasing the quantity of respirable particles.
- Mask COMFORT & SEAL: the soft material and the ergonomic contour ensures a perfect seal and comfort to the patient in order to allow for a correct inhalation technique. The safety expiratory valve ensures a complete CO_2 exhalation.

Materials:

Anti-static inhaling chamber in polycarbonate
Silicone ring valve for universal connection
ABS cap
Safety silicone breathing valve &PVC mask
Latex free
DEHP free
