Anesthesia mask

- Reusable mask with silicone diaphragm; fit for dogs, cats and other small animals, suitable for anesthesia, ventilation and aerosol therapy.
- The significant flexibility of the diaphragm permits a minimal air leakage during ventilation.
- The specially designed shape of the cone assures low air resistance.
- The soft and sensitive diaphragm ensures minimal skin damage.
- Latex free material.
- Available in six sizes: small Dog – medium Dog – large Dog – small Cat - medium Cat- large Cat.
- The six different models allow a perfect fitting of any kind of animals, from large dogs to small cats and other animals as well (rodents, rabbits,reptiles…).

The mask holder (optional), made of elastic and resistant material, allows you to easily secure the device to the animal's muzzle.

Code	Description	Replacement Diaphragm
KM-701	Large dog	KM-711
KM-702	Medium dog	KM-712
KM-703	Small dog	KM-713
KM-704	Large cat	KM-714
KM-705	Medium cat	KM-715
KM-706	Small cat	KM-716
KM-721	Fixed universal mask	

Crystal Airway Mask

Valve with spring and sealing O-ring, ensures the maintenance of the inflation pressure without leaks. Control balloon, cuff pressure in soft PVC, for greater sensitivity in managing the inflation pressure

Laryngeal Mask

- Very soft and atraumatic cap adapts perfectly to the tissues avoiding possible microtraumas
- The back of the cap is thicker to facilitate insertion and to avoid anomalies positioning
- A cuff inflation line is integrated in the ventilation tube
- The ventilation tube has an anatomical curvature
- The cuff has a large internal volume to avoid possible obstructions.
- Free of latex, DEHP and BPA
- Easy and safe to use
- In sterile packaging
- Available in 7 sizes
- Color code

Code	Size	Patient weight (kg)	Maximum cuff volume (ml)	Maximum pressure cuff	Connector diameter	Item per box
KM-817	5	70/100	48	< 60 cm H2O	15mm M	10
KM-827	4	50/70	35	< 60 cm H2O	15mm M	10
KM-837	3	30/50	20	< 60 cm H2O	15mm M	10
KM-847	2,5	20/30	15	< 60 cm H2O	15mm M	10
KM-857	2	10/20	10	< 60 cm H2O	15mm M	10
KM-867	1,5	5/10	7	< 60 cm H2O	15mm M	10
KM-877	1	< 5	5	< 60 cm H2O	15mm M	10

Crystal FlexCam

Laryngeal Mask

- Very soft and atraumatic cap adapts perfectly to the tissues avoiding possible microtraumas
- The back of the cap is thicker to facilitate insertion and to avoid anomalies positioning
- A cuff inflation line is integrated in the ventilation tube
- Longer length ventilation tube with steel wire reinforcement ensures patency during surgical procedures that require tube positions at particular angles.
- Free of latex, DEHP and BPA
- The cuff has a large internal volume to avoid possible obstructions.
- Easy and safe to use
- In sterile packaging
- Available in 5 sizes
- Color code

Valve with spring and sealing O-ring, ensures the maintenance of the inflation pressure without leaks. Control balloon, cuff pressure in soft PVC, for greater sensitivity in managing the inflation pressure

Code	Size	Patient weight (kg)	Maximum cuff volume (ml)	Maximum presure cuff	Connector diameter	Item per box
KM-818	5	70/100	48	< 60 cm H2O	15mm M	10
KM-828	4	50/70	35	< 60 cm H2O	15mm M	10
KM-838	3	30/50	20	< 60 cm H2O	15mm M	10
KM-848	2,5	20/30	15	< 60 cm H2O	15mm M	10
KM-858	2	10/20	10	< 60 cm H2O	15mm M	10

Fisio Chamber Vision

- ANTI-STATIC CHAMBER

The special anti-static treatment of the chamber ensures a complete suspension of the drug, improving the dose available for the patient.

- VISION VALVE

The movement of the Vision Valve indicates inhalation and permits monitoring of patient compliance. The one-way valve has very little resistance to flow and can be opened with minimal inspiratory effort (suitable for patients with low tidal volume).

- UNIVERSAL ADAPTER “PROPER FIT”

The soft and deformable silicon material of the adapter ensures a perfect seal with all commercially available inhaler connectors

- SPIRAL VENTS

The design of the spiral vents directs the drug towards the one-way valve, thus increasing the amount of drug particles that can be inhaled

- MASK CONFORT & SEAL

The soft material and the ergonomic contour ensures a perfect seal and comfort to the muzzle of the small animal the patient in order to allow for a correct inhalation technique. The Safety expiratory valve complete release of exhaled CO2.

Code	Descriptin	Size	Item per box
KM-1020	Anti-static inahaler chamber with Vision Valve for MDI	Standard	12
KM-1021	Anti-static inhaler chamber with mask KM-1024 for MDI.	Size animals medium	10
KM-1022	Anti-static inhaler chamber with mask KM-1025 for MDI.	Size animals small	10

Manual Resuscitator Balloons

- Resuscitator is made of PVC and polycarbonate without DEHP
- Latex Free
- Available in three sizes
  - Large: 1700 ml volume
  - Medium: 700 ml volume
  - Small: 300 ml volume
- Single patient use

The kit is sold in a single package, with a carrying bag, containing:

- Resuscitator balloon,
- Oxygen connection tube,
- Reservoir,
- Overpressure control valve (pop off), which can be connected to anaesthesia masks.

Code	Size	Description	Overpressure valve	Item per box
KM-8062	Large	Manual resuscitator	60 cm H2O	10
KM-8072	Medium	Manual resuscitator	40 cm H2O	10
KM-8082	Small	Manual resuscitator	40 cm H2O	10
